

JUAN RUIZ GARCÍA

FRONTEND DEVELOPER

+10 years experience as web developer. Lean mindset, resolute and self-taught, supported by my experience in the startup field, from inception to market consolidation.

WORK EXPERIENCE

Web developer at Conecta Turismo

June 2012 - Present [Web technology for travel agencies, SaaS, B2B, B2C]

RESPONSIBILITIES

- Head of the frontend department and frontend development of +200 projects with customized designs using HTML, CSS, JavaScript, AngularJS and Bootstrap.
- Coach and mentor trainees in the frontend department.
- Integration of Redsys Payment Systems, PayPal or Stripe.
- Providing estimated time for the development of each project.
- Managing the support department.
- Establishing direct communication and managing relationships with clients for analysing needs, project management, and proposing technological solutions for tourism professionals, both nationally and internationally (mainly in LATAM).
- Development of custom WordPress websites using Elementor.

KEY ACCOMPLISHMENT

- First employee of the startup (10 clients at that time). Currently we have +95 active clients and +10 employees.
- Developed, during the COVID pandemic, a marketplace of activities subsidised by the Spanish government, incorporating a comprehensive booking and payment system.
- Implemented SCRUM methodology within the organization.
- Consistently contributing with ideas and improvements to our system, aiming to enhance frontend development efficiency and improving client usability.

- Suggested the use of monday.com to track the status of each project, resulting in improved customer satisfaction by allowing them to monitor their project's progress.
- Proposed the implementation of Jira as the ticketing system, which significantly transformed ticket management within the company.
